In short

Programming is fun. Building successful web applications is even better. The most fun however is developing them as part of a team of ninjas, using beautifully designed tools. This is the type of position I'm looking for. *For the years of 2009 - 2010 I am only accepting remote positions with rare, preplanned meetings.*

Personal / Skills

Main expertise

- ✓ Ruby
- ✓ PHP
- ✓ SQL
- ✓ Javascript
- + Rails
- + Drupal, Zend Framework
- + PostgreSQL, MySQL, Oracle, MSSQL
- + Prototype

Up the sleeve

- ✓ Web Services, REST
- ✓ Regular Expressions
- ✓ Versioning Systems - GIT, SVN
- ✓ *nix Systems, Configuration

Communication

- ✓ Write tech articles at [mediumexposure.com](https://medium.com/@mchernyak)
- ✓ Work directly with clients
- ✓ Fluent in English and Russian

Education

Polytechnic University, Brooklyn
Computer Science, BA-Unfinished
(completed essential CS and Math courses)
